APPLICATION FOR ELECTRIC SERVICE
MULTIPLE UNIT COMMERCIAL/INDUSTRIAL COMPLEX

(Design fee must be submitted with the application)

Date of Submission: _____

Business Name to appear on all construction accounts _____

Service Address _____

If tax exempt, you must attach a copy of your exemption license or a State tax exemption form.

Current mailing address _____

Contact Name _____

Office telephone _____ Mobile telephone _____

Fax number _____

Contact email address _____

Electrical Engineer Firm _____

Contact's name _____ Telephone _____

Mobile telephone _____ Fax number _____

Electrical Engineer's email address _____

Civil Engineer Firm _____

Contact name _____ Telephone _____

Mobile telephone _____ Fax number _____

Civil Engineer contact email address _____

Date electric service needed: Temp/Construction _____ Permanent _____

REQUIRED FOR ELECTRIC SYSTEM DESIGN, RIGHT-OF-WAY ACQUISITION

- _____ Survey Plat of Complex (All easements noted) **paper copy and GIS/AutoCAD files** (see below) of complete project layout
- _____ Construction plans for complex – complete set (paper copy only)
- _____ Construction plans (paper copy only) for off-site road improvements requiring overhead lines to be relocated or converted to underground (if applicable)
- _____ Designate preferred transformer(s), meter/meter bank location(s)
- _____ Designate preferred underground electric cable route
- _____ Designate electric service locations for:
 - _____ Construction power
 - _____ Signs
 - _____ Lighting
 - _____ Other Special Requirements
 - _____ Identify third party facilities within property that require rerouting of electric service
 - _____ Irrigation
 - _____ Kiosks
 - _____ Traffic signals

GIS / AUTOCAD FILE REQUIREMENTS FOR ELECTRIC SERVICE
GIS/AUTOCAD LAYERS MUST BE CLEARLY IDENTIFIED
BELOW BEFORE SUBMITTING THE APPLICATION

For the purposes of designing and constructing electrical service, United Power requires 1 of the following 3 digital data file types of the entire subdivision plat or project:

1. ESRI Personal Geodatabase (ArcGIS 9.x, Microsoft Access 97 or newer format)
2. ESRI shapefiles
3. AutoCAD.dwg or .dxf file

The requirements for ESRI or AutoCAD files are detailed below. Please indicate which type of deliverable you are submitting:

ESRI Personal Geodatabase ESRI shapefiles AutoCAD file

ESRI file type requirements

- Shapefile or Personal Geodatabase feature classes.
- The deliverable **MUST** contain the information specified in Table 1 in separate feature classes. For each Table 1 layer, please identify which feature classes contains the specific information requested.
- The GIS deliverables should be produced from the property survey plat. United Power does **NOT** require GIS data pertaining to the construction plans.
- A Projection (.prj) file must be delivered which contains the exact details of the projected or geographic coordinate system, reference datum, and units of measurement (eg. NAD 83, Colorado State Plane North Zone, U.S. Survey feet). In addition, please enter the details of the coordinate system below. If the data are referenced to a ground-based coordinate system, the projection file should accurately reflect this change or we must be provided with the combined scale factor utilized to compute the grid-to-ground conversion.

Projected Coordinate System: _____

Geographic Coordinate System and Measurement Units: _____

Reference Datum: _____

Combined Scale Factor (if ground coordinates were used): _____

New False Easting (if modified) _____ New False Northing (if modified): _____

- These data should be delivered on a CD or by e-mail to: PowerApp@unitedpower.com. Please contact United Power for further delivery information.
- This sheet **MUST** be completed and included with the GIS deliverables.

AutoCAD file type requirements

- The AutoCAD **MUST** contain the information specified in Table 1 in separate layers. For each item, please identify which layer contains the specific information requested in Table 1.
- The AutoCAD file must **NOT** contain “X-refs” or other references to external files.
- The AutoCAD file must **NOT** be write protected.
- The AutoCAD file should be drawn from the property survey plat. United Power does **NOT** require an AutoCAD file of the construction plans.
- Please indicate below whether the AutoCAD file is in a local or georeferenced coordinate system. If the drawing is in a georeferenced coordinate system (based on a GPS tie, for example), indicate the exact details of the projected or geographic coordinate system, reference datum, and units of measurement (e.g., NAD 83, Colorado State Plane North Zone, U.S. Survey feet). If the data are referenced to a ground-based coordinate system, we must be provided with the combined scale factor utilized to compute the grid-to-ground conversion. When possible attach a World File (.wld) to the AutoCAD file with the projection information.

Coordinate System: Local Georeferenced

Projected Coordinate System: _____

Geographic Coordinate System and Measurement Units: _____

Reference Datum: _____

Combined Scale Factor (if ground coordinates were used): _____

New False Easting (if modified) _____ New False Northing (if modified): _____

- The AutoCAD file should be delivered on a CD or by e-mail to: PowerApp@unitedpower.com. Please contact United Power for further delivery information. **(Our email system won't allow .zip files to come through. Please rename the .zip extension to something else, i.e., .zap.)**
- The AutoCAD file should be delivered with the layers listed below turned “on.” Additional layers should either not be turned on or ideally not be present in the file.
- This sheet **MUST** be completed and included with the AutoCAD file.

Detail the **EXACT** layer names containing the requested information in **ALL** fields below:

Table 1 - Required GIS/AutoCAD Layers

1. Street Right-of-Way	Feature Class/Layer Name:
2. Lot and tract boundary lines	Feature Class/Layer Name:
3. Utility and drainage easements	Feature Class/Layer Name:
4. Section corners and other primary survey ties	Feature Class/Layer Name:
5. Section lines	Feature Class/Layer Name:
6. Street names and boundaries	Feature Class/Layer Name:
7. Outlot and tract annotation	Feature Class/Layer Name:
8. Building(s) layout	Feature Class/Layer Name:
9. Road center lines and road edge	Feature Class/Layer Name:
10. Other (landscape, drainage, wet utilities, etc.)	Feature Class/Layer Name:

Confidential Information

(This form **MUST** be filled out in order to process your application.
When your job is completed this form will be appropriately disposed of.)

CONTACT INFORMATION:

Customer Name: _____ Soc Sec #/FEIN: _____

Service Address: _____

Contact Number: _____

TYPE OF CONSTRUCTION:

(choose one)

DESIGN FEE

____ Individual Residence	\$350 per extension <i>(Each redesign will be an additional \$350)</i>
____ Residential Apartment Building or Complex	\$750 per building <i>(Each redesign will be an additional \$750)</i>
____ Individual Commercial or Industrial Building	\$750 per building <i>(Each redesign will be an additional \$750)</i>
____ Relocation/Conversion to Underground of United Power Facilities	\$750 + \$1/lineal foot <i>(Each redesign will be an additional \$750)</i>
____ Multiple Unit Commercial or Industrial Complex	\$1,500 per building + \$50 per unit/meter <i>(Each redesign will be an additional \$1,500)</i>
____ Subdivisions or PUD Development	\$1,500 + \$50 per lot <i>(Each redesign will be an additional \$1,000)</i>

Design Fee Total \$ _____

(Application fees and redesign fees will be non-refundable and applied to the cost of the project and included in the Line Extension Agreement for any required construction of United Power facilities. If there is not an agreement signed within one year of the application date, a new application will be required.)
